IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Date:

To: The Residents of Reading

This is to provide you with follow-up notification that the potential water quality problem at Reading has been resolved. Residents no longer need to boil water for drinking or seek an alternative source of water for household consumption.

Water samples collected have revealed a safe, potable water supply.

We will continue to collect routine water samples and have them analyzed for bacteria monthly. This is a requirement of the Safe Drinking Water Act, Act 339 P.A. 1976.

Customers with questions or concerns about the water should contact the Tom Stephenson at 517-398-4825.
